

Long-Wearing Vinyl Graphics for Wrapping Commercial Table Tops with Custom Designs in Los Angeles, CA!

Do you recall the [custom postcard wall wrap design](#) we created for Amazon's LGB7 facility? The client liked the design so much that they asked us to use it when putting together vinyl graphics for wrapping commercial tabletops. These tables were located in the leadership lounge and did not fit in with the interior decor.

Our technicians used a high-tack vinyl with an 8-mil-thick textured floor laminate to ensure long-lasting wear. This floor laminate is twice as thick as regular laminates and, therefore, is sure to have the long-wearing qualities the client wanted. The use of the postcard design makes the tables fit in beautifully at the facility. Additionally, we featured the facility's logo and mascot.
